## ENVIRONMENTAL POLICY

The management of environmental problems connected to manufacturing activities is understood by IDEAL BLUE MANIFATTURE S.p.A. not only as a commitment to continuing compliance with all current legal requirements, but also as the implementation of means and instruments for the continued improvement of environmental performance and for the prevention of pollution resulting from its activities, products and services.

The organisation IDEAL BLUE MANIFATTURE S.p.A. considers safeguarding the environment to be essential for the quality of life and for sustainable development, and the choice to implement an Environmental Management System that conforms to the UNI EN ISO 14001 regulation not only ensures compliance with the applicable environmental legislation and regulations, it also allows IDEAL BLUE MANIFATTURE S.p.A. to achieve continued improvements to environmental performance, aiming constantly for prevention and protection against pollution.

With this document, the Management intends to set out its environmental policy, stating that :

- the environmental policy takes into account the nature, dimension and impact on the environment of the company's activities, products and services;
- the environmental policy will be reassessed during annual audits of the environmental management system and amended when appropriate;
- the company is open to dialogue with its employees, the public and the competent authorities regarding environmental improvement targets;
- the environmental policy outlined here is made operative, maintained, and circulated to all staff;
- all company suppliers will be made aware of this policy;
- this environmental policy is available to the public.
- the environmental policy takes into account any changes linked to variations to procedure in company activities, to staff changes, new information related to the environmental aspects and environmental impact and relevant technologies and changes to the regulatory environment.
- the environmental policy is aligned with the company's operating context;

- the environmental policy is the foundation of eco-improvement aims for the environmental management system;

The general directions of environmental policy as identified by the Management, which intends to pursue same, are as follows:

- sustainable use of resources;
- life cycle analysis;
- promotion of suitable measures to reduce the impact of climate change;
- safeguarding of biodiversity and ecosystems;
- management of the activities that can generate environmental impact;
- maintaining preferential relationships with suppliers who set aims for environmental improvement;
- Improvements to workplace environment conditions for staff;
- obtaining and maintaining certification for the environmental management system;
- promotion of responsibility and awareness among employees and office workers of all levels in company activities, through suitable information and training programmes so that their tasks can be performed while respecting the environments.

For the implementation of its environmental policy, the Management will identify and quantify specific targets every year, in line with the main aims, on a specific document, which will specify:

- firm objectives and goals to achieve for the current year;
- the programmes set for achieving the objectives and goals, including the resources identified and made available, as well as the relevant managers.
